\$285.00 post marked or delivered by 9/29 \$300.00 after 9/29 16 CEU Credit Hours Awarded

Ortho-Bionomy® is a positional release modality based in osteopathy and effectively addresses muscle spasm, structural imbalances, joint pain, and restricted range of motion. The techniques are profound in simplicity and effectiveness. Due to the gentleness of the work acute pain can be addressed as well as chronic conditions that require an ongoing process of rehabilitation. Internationally established, Ortho-Bionomy has been offered in the US since 1976. It combines well with other bodywork and therapy to facilitate new patterns of structural alignment, balance, flexibility, and ease.

This Phase 4 class covers the history and principles of Ortho-Bionomy and specific positioning techniques to stimulate natural self-correcting neuro-muscular reflexes for all parts of the body. These techniques facilitate the release of pain and tension patterns, promote expanded range of motion, and offer a greater sense of well-being. This work is easy to learn, easy on your body, highly effective, and combines well with any system of health care.

Luann Overmyer, LMT, NCBTMB, is a Registered Senior Practitioner and Advanced Instructor with the Society of Ortho-Bionomy International®. Trained by British osteopath and founder, Arthur Lincoln Pauls, she has been involved in the practice, teaching, and development of Ortho-Bionomy for over 30 years. Luann trains practitioners, mentors instructors, and teaches throughout the United States and Australia. Her training programs incorporate a wide spectrum of techniques designed to promote healthy functioning and teach us to discover comfort. Her courses are certified for NCBTMB and Florida Continuing Education. Luann is the author of Ortho-Bionomy, A Path to Self Care available at ortho-bionomy.org and amazon.com.
